The Integrated Mission Group for Security (IMG-S) is a wide multi-disciplinary European professional network bringing together experts from Industry, SMEs, Research and Technology Organisations (RTOs), Academia and End-users. It has more than one hundred entities from 24 European countries. IMG-S aims to support the European Commission and its Member States to build world-class European technological capabilities. By defining research priorities for the security domain at all levels, from fundamental research to mission capabilities and system integration, IMG-S contributes to ensure that short, mid-term and long-term security needs are addressed.

ENLETS (European Network of Law Enforcement Technology Services) is the European network under the European Commission that shares best practices, activates co-creation and stimulates research in the technology domain for law enforcement. ENLETS was established by Council Conclusions in 2008. ENLETS core group holds 10 member states and 27 National Contact Points. ENLETS supports front line policing and the fight against serious and organized crime by gathering user requirements, scanning and raising awareness of new technology and best practices, benchmarking and giving advice. It is active in joint initiatives, sharing information and networking between law enforcement agencies, industry and research organizations. It is a point of contact to access European law enforcement technical organizations.
